

## Local Rules

Set: Monday 24<sup>th</sup> November. Due: Friday 28<sup>th</sup> November (1430, School Office)

### Assignment:

Local Rules are 'Mandatory Instructions' that are formulated to secure compliance with health and safety legislation.

- (a) Name the current legislation to which all local rules for sources of ionising radiation must conform.
- (b) List five points that should be listed in the local rules
- (c) Who is responsible for writing and updating the local rules?
- (d) Who should read the local rules?

**Word limit = 350 Max**

**(Staple this sheet to the front of the your work)**

### Marking Scheme

Range	Credibility of References	Mark
14 - 15	Assignment is difficult to fault.	
12 - 13	No significant deficiencies-some minor errors of fact. Overall a good knowledge of regulations and their application.	
10 - 11	A few significant deficiencies but the major points covered. Good presentation.	
7 - 9	Some significant deficiencies but no major errors in the material present. Good presentation.	
4 - 6	Some significant errors of fact and interpretation; otherwise material in recognisable form.	
0 - 3	Major flaws present; poor presentation; no interpretation relevant to the question.	

Range	Credibility of References	Mark
5	Coverage that is difficult to fault.	
4	No significant deficiencies; but a number of minor omissions.	
3	Only a few significant deficiencies, but the expected components well covered.	
2	No major omissions but a number of significant deficiencies.	
1	Only one or two major omissions.	
0	A number of major omissions, not approaching acceptable coverage.	

<b>Total Mark (out of 20)</b>
